Course: BSc(Hons) Applied Software Development (UI310)
Module: Applied Algorithms and Data Structures

This module aims to provide students with the skills to manage projects that have deviated from their intended timeline and requirements. It will develop their knowledge of Agile as well as work on their communication skills to produce constructive feedback for peers. This module's technical aims are to provide students with an understanding of common problem-solving techniques and to introduce them to security threats on safety critical systems.
